

PRESS RELEASE

New Product

Aquila® lightweight and stretchy Cut 3 glove

The recently announced Aquila® DPU325 protective glove using Alkimos® yarn technology offers their finest, softest and stretchiest cut 3 level personal protection making it highly suitable for handling and assembly of ultra fine sharp parts in industries such as automotive and glass assembly where good dexterity is required with a high degree of wearability.

As a hand protection work glove the lightweight DPU325 with stretchy (DMF free) polyurethane coating offers superb flexibility, comfort and softness with multiple washability, making these industrial safety gloves especially economical over an extended operational life.

Alkimos® yarn is based on ultra high molecular polyethylene spiral wound structure which ensures the EN420/EN388 cut level 3 protection is maintained with exceptional comfort.
